

MUHAMMAD ALI

AI Engineer

ali.siddiquibro34@gmail.com | +92-317-6376267 | www.linkedin.com/in/muhammad-ali-8a66082b1

PROFESSIONAL SUMMARY

Motivated AI & Generative AI Developer with hands-on experience in computer vision, real-time object tracking, and AI agent development. Recognized as a Top Performer in the NCEAC-HEC Generative AI Cohort. Proficient in Python, Generative AI, Deep Learning, NLP, YOLOv8, OpenCV, and Streamlit, with certified expertise in Azure AI Agents and Microsoft Copilot integrations. Driven to build high-performance AI solutions and interactive web applications.

WORK EXPERIENCE

AI & Computer Vision Intern | CodeAlpha | Jun 2026 – Jul 2026

- Engineered and deployed a real-time multi-object detection and tracking system using YOLOv8 and ByteTrack.
- Built interactive web-based analytics dashboards using Streamlit to monitor live video streams at 24+ FPS.
- Designed dynamic speed estimation algorithms with pixel-to-meter perspective mapping and custom velocity logic.
- Integrated crossing-line analytics and automated counters for real-time traffic flow measurement.

Generative AI Developer Intern | Arch Technologies | Jul 2026 – Present

- Architected end-to-end Generative AI, NLP, and Deep Learning modules as part of the Arch Technologies initiative.
- Developed custom AI agent setups and LLM application pipelines utilizing Python, PyTorch, and Azure AI services.
- Optimized model inference speed and real-time dashboard performance through collaborative problem-solving.
- Applied intelligent prompt engineering techniques and fine-tuned AI workflows to enhance model accuracy.

Generative AI Developer Trainee | UETIANS Lahore Endowment Foundation / HEC (in collab with iCodeGuru) | Jan 2026 – Mar 2026

- Awarded Top Performer Certificate among competitive cohort in NCEAC-HEC Generative AI Training Cohort 2.
- Designed, built, and successfully deployed 14+ interactive Generative AI & ML applications on Hugging Face Spaces.

EDUCATION

BS ARTIFICIAL INTELLIGENCE | UNIVERSITY OF LAHORE | 2025 – Present

CGPA: 3.26 / 4.0 · Python Programming, Machine Learning (ML), Deep Learning (DL), Natural Language Processing (NLP), Computer Vision, Programming Fundamentals (C++), Data Structures & Algorithms

TECHNICAL SKILLS

Languages:	Python, C++
AI:	Generative AI, Large Language Models (LLMs), Prompt Engineering, NLP
Machine Learning:	Deep Learning (DL), Model Fine-Tuning, Predictive Modeling
Computer Vision:	YOLOv8, ByteTrack, OpenCV, Real-Time Object Tracking, Speed Estimation
Frameworks:	PyTorch, Streamlit
Cloud & Platforms:	Azure AI Agents, Microsoft Copilot Chat, Hugging Face Spaces, Google Colab, Kaggle

PROJECTS

Real-Time Multi-Object Detection & Tracking System | Personal Project | 2026

- Built a real-time computer vision dashboard using Python, Streamlit, YOLOv8, and OpenCV for video analysis.
- Hosted and deployed the interactive application interface completely built in Streamlit.

Generative AI & ML Application Suite | 14+ Deployed Projects | 2026

- Designed, fine-tuned, and deployed a portfolio of 14+ interactive Generative AI, NLP, and Deep Learning applications.
- Deployed AI models on Hugging Face Spaces using PyTorch, Transformers, & Streamlit.

CERTIFICATIONS

- Generative AI Application Developer Certificate (Top Performer Award) — UETIANS Lahore Endowment Foundation / HEC / iCodeGuru, 2026
- Professional AI Agent Development & Microsoft 365 Copilot — Microsoft, 2026
